Re: ITW Tekna Spray Gun with 7E7 air cap

Dear Mr. Charpie:

The Antelope Valley Air Quality Management District (District) has reviewed your December 11, 2008 letter requesting approval of the ITW Tekna Spray Gun with 7E7 air cap as equivalent to High Volume – Low Pressure (HVLP). The District hereby approves the use of the ITW Tekna Spray Gun with 7E7 air cap as equivalent to an HVLP gun under the same conditions as those specified by the South Coast Air Quality Management District in their December 9, 2008 letter (for automotive coatings only, operating pressure not greater than 22 psig, must be equipped with pressure gauge).

If you have any questions regarding this letter, please contact me at (760) 245-1661, extension 6726.

Sincerely,

A handwritten signature in black ink, appearing to read "Alan J. De Salvio". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Alan J. De Salvio
Supervising Air Quality Engineer
